

# NeoFS and N3 Oracles

Alexey Vanin, NeoSPCC, DevLog 2021

# N3 Features

- NeoFS - decentralized object storage for real-world applications
- Oracles - access off-chain data inside the smart contracts
  - HTTP Oracles
  - NeoFS Oracles
  - Async
- Many more

# What we are going to do

1. Revise how to upload data into NeoFS
2. Write smart contract using neo-go
3. Use oracle call to access data from NeoFS

# What we are going to do

1. Revise how to upload data into NeoFS
2. Write smart contract using neo-go
3. Use oracle call to access data from NeoFS

## Prerequisites:

- Go v1.17 <https://go.dev/dl/>
- neo-go v0.97.3 <https://github.com/nspcc-dev/neo-go/releases>
- neofs-cli v0.26.1 <https://github.com/nspcc-dev/neofs-node/releases>

# Multiplayer game app

Smart contract controls character equipment and balance.
